

DANIEL D

Frontend Developer

+91 7449290770 @ danieldani5373@gmail.com https://www.linkedin.com/in/daniel-d07/ Bengaluru, India

SUMMARY

Frontend Developer with 2+ years of experience building scalable enterprise banking applications using Angular and TypeScript. Strong focus on solving real-world business challenges through efficient, high-performance UI solutions. Experienced in REST API integration, performance optimization, and developing reusable components. Committed to continuously learning evolving Angular features and applying best practices to deliver clean, maintainable code. Passionate about writing clean, maintainable code and delivering seamless user experiences across complex, large-scale applications.

EXPERIENCE

Angular Developer

UST Global

08/2024 - Present Bengaluru, India

Leading company in technology and consulting services

- Developed and maintained Angular applications used across multiple countries, improving UI responsiveness and consistency
- Collaborated with cross-functional teams, including UX designers, backend engineers, and business stakeholders, to deliver banking solutions aligned with functional requirements
- Integrated REST APIs to streamline data flow, improving data handling efficiency by ~20%
- Applied optimized component design and lazy loading techniques, reducing initial load time by ~15%
- Coordinated with cross-functional teams using JIRA to deliver features on schedule across multiple modules
- Resolved production issues proactively, reducing recurring defects and improving application stability
- Enforced coding standards and best practices, contributing to improved code quality and reduced review cycles

Frontend Development Intern

UST (formerly Moonraft Innovation Labs)

07/2023 - 08/2024 Bengaluru, India

Digital product design and development company

- Built responsive and user-friendly web applications using HTML, CSS, JavaScript, and TypeScript
- Contributed to multiple tracks, assisting in UI development, bug fixes, and performance improvements
- Used Git for version control, enabling efficient collaboration and code tracking
- Followed structured coding practices to ensure maintainability and scalability

EDUCATION

B.Tech – Artificial Intelligence and Data Science

Karpagam Institute of Technology

08/2020 - 05/2024 Coimbatore, India

TRAINING / COURSES

NPTEL Elite Certification on DBMS

Elite certification on Database Management Systems

NPTEL – Introduction to Machine Learning

Course on the basic concepts of machine learning

Data Science and Machine Learning

Strong foundational knowledge of Data Science and Machine Learning methodologies

Java Basics Certification

Demonstrated understanding of core Java fundamentals and problem-solving skills

Angular

Built an Angular 19 project and gained hands-on experience with Signals, lazy loading, and modern Angular concepts

JavaScript

Learned the fundamentals of JavaScript, including variables, functions, DOM manipulation, and event handling

SKILLS

Angular	TypeScript	REST	Dataflow	JIRA	HTML	CSS	JavaScript	Git	Cypress
Tailwind	Angular CLI	Angular Material	SCSS	SASS	Java	Python	GitLab	Figma	
Unit Testing	Jest								

PROJECTS

Standard Bank Project

📅 08/2023 📍 Multinational

A project focused on delivering reliable banking solutions

- Developed and enhanced banking applications deployed across multiple countries
- Built lending modules including Cash Advance, UPL, Car Loan, Credit Card Loan, Home Loan, registration, query management, and CIF modification features
- Designed and implemented reusable Angular components, reducing development time by 40% while improving scalability and maintainability and built Reactive Forms and Change Detection for better performance
- Used NgRx and RxJS for efficient state management
- Improved UI performance and usability through enhanced component design and efficient data handling

E-Store Application

📅 01/2023 - 07/2023

A scalable e-store platform with a focus on user experience

- Designed and developed a responsive e-store web application following modern UI/UX standards
- Used Signal Store for efficient state management across the application
- Built reusable components, improving development efficiency and maintainability

KEY ACHIEVEMENTS

Enhanced Banking Applications

Successfully improved performance and responsiveness of banking applications used across multiple regions

On-Time Feature Delivery

Delivers features consistently across international markets within defined timelines

Improved Application Stability

Reduced production issues through proactive debugging and monitoring
